Mr. James Bu ord wishes the GLOBE-REPUB-Lic to state to the members of the late Republican Convention that he is truly grateful to them for the honor they conferred upon him in nominating him for Township Trustee, but as there seems to be some dissatisfaction, not on account of his nomination, so far as he knows, but because of the departure from the usual custom of giving the township two trustees, instead of one, as now nominated, he wishes to decline the nomination, and at the same time assure the Republicans of the city and township that he will do all he can to promote the election of the gentleman who may be chosen to succeed him, and, further, will exert himself to secure the election of the whole ticket.

SCOTT LAW ASSESSMENTS.

Argument in Court on Demurrer to Sa-Paid in Under That Law.

Monday afternoon in Common Pleas court Judge Goode heard argument under John Casey, of 246 East Columbia street, defendants' demurrer generally to petitions was taken suddenly ill on East Main street filed by saloon keepers and others against the money paid into the treasury as assessments under the Scott law, of which there are fifty or more. Oscar T. Martin, Esq., as counsel for the defendant in his official capacity, addressed the Court. The first proposition was that there was no act on the part of the Tressurer which indicated that he had seized or was about to seize the property of Presbyterian Church this evening at half past | the tax payer for the delinquent taxes and if seven o'clock by the pastor. There will also payment of taxes was made before any such overt act on part of the Treasurer then such Friday evenings. Everybody is invited to payment was voluntary and could not be re-Also that money collected under the Scott law was in the nature of an assess ment and not a tax, and that, as such assessment, it could not be collected except by suit at law in which the tax payer would have his "day in court," and hence there could have been no involuntary payment under such circumstances. The most important proposition riers, distributing tables and cases for various submitted by Mr. Martin in his argument was in substance that the Supreme Court having, in June 1883 given construction to the Scott law, declaring it constitutional and under sanction of that decision vested rights and interests having been acquired in the tax paid in in pursuance thereof, that a subsequent decision in October, 1884, declaring the same law unconstitutional, could not impair such vested rights or interests acquired prior thereto. Mr. Martin claimed that the declaration of the Organic Law that no law should be passed or have force which would impair contracts or vested rights was bin sing upon the Supreme Court as well

One of the most forcible illustrations used by Mr. Martin, as to effect of a contrary rule on vested right; acquired under the sanction of the supreme court, was that there was a that a certain portion of the tax derived from the Scott law should create a fund for the Intermediate P-nitentiary; that ten per cent, of the said tax was so collected and paid over to the State by the county treasurer. auditor, in case of a judgment against the treasurer for illegal taxes collected and distributed, to pay said judgment from the various funds which had received the same. But in the case of the intermediate penitentiary fund this could not be done, as that fund, having been created entirely by the Scott law, passed out of existence when that law was declared invalid, and hence that fund could not be assessed for its proportion.

It was also argued that the tax which had been paid over to the different corporations of the county and been expended by them under sanction of the Supreme court had vested in such corporations a property interest, which was sacred as the property rights of individuals and entitled to the same protection. Mr. Martin cited the Court to numerous decisions of the Supreme court of this State and of the U. S. Supreme court as well as declarations from Cooley, Kent and Parsons sustaining the legal propositions for which he had contended.

Although plaintiffs were numerously and ably represented by counsel the demurrer was submitted without argument on that side, only Mr. Murray, of London, citing to the Court a number of authorities.

Should the Court sustain the demurrer there will be no further proceedings in this court and the cases will have to be taken to the higher courts. Mr. Martin's able and exhaustive argument was listened to with closest attentign by those fortunate enough to be

present during its delivery. The Wish Father to the Thought. The William Henry Garnett Club, an orcity for social enjoyment and mutual improvement, met last evening at their room on Main street, with an attendance of sixty or seventy, the president, Mr. Jewett, in the chair. This was the meeting advertised by parties anxious for the defeat of the Republican city ticket as held for the purpose of organizing a colored Democratic club, to supobject he would have been easily convinced the Democracy had nothing to hope for in on the first Monday in April next. It is likely the club will, at the proper time, take some formal action in the premises, publicly declaring its sentiments as a clab and as in-

During it he went around congratulated also upon the appearance of among his triends, of whom he had many, being quite an affable, companionable young fellow, borrowing money in sums of from \$5 up to \$25, making various pleas as to his need of the money, and seldom meeting with a refusal where the party applied to was in tunds. EXTENDING THE LINES.

Important Action of the Citizens' Street Railway Company-New Routes and New

Rolling Stock.

At a meeting of the stock-holders of the Citizen's Street Railway Company, held in the

Springfield National Bank, it was decided to make several extensions of lines and several new rouets were considered, among them the proposed North Side line. The most practicable route for that line was thought to be out North Market street to College avenue, thence to and north on Limestone street, returning by the same route or all the way on Limestone street. It was further definitely deeided to extend the Red Line west on Main street to the railroad crossing, and perhaps to the first covered bridge at West Springfield. There has been for some time more or less talk of the establishment of a railroad station at the West end to accommodate passengers in that part of the city and this extension would furnish transportation to all parts of the city. At noon yesterday men were put at work restoring the tracks on South Limestone street and tomorrow Green Line cars will, it is thought, again run through to the end of that route. It was decided at the meeting to purchase an additional number of mules and probably the number of cars will be increased shortly. To make all these additions and improvements necessitates an increase of the capital stock which has already been voted and tomorrow or next day Supt. Stroud wil go to Columbus and file with the Secretary of State the required certificate of such increase, from \$100,000 to \$250,000. The time is now nearly approaching when the work can be entered upon advantageously and it will be pushed all along the line. There is much satisfaction among South End residents, especially the ladies, over the restoration of the Limestone street route, which has been in disuse during the building of the sewer.

Millionaire Newspaper Men. Philadelphia rejoices in the possession of three newspaper millionaires. George W. Childs, the chief, has in his paper, the Public Ledger, the finest newspaper property in the country. It the expenditure of a trifle in cash and next to nothing in nerves or temper. He bought it when it was a losing proprty, placed it upon a solid basis, as established it so firmly as the houseold journal of the Quaker City that it cannot be dislodged. Mr. Childs owns a marble palace in town, a villa at Long Branch, and a castle and big village in the country. He has entertained more distinguished men than all the rest of Philadelphia put together. His wife is a daughter of Peterson, the publisher. She cares very little for society, and is altogether a gentle and lovable woman. They have no children, and it is said to as good as settled that a large part of Mr. Childs' wealth will eventually go to one of the children of his chum, ony Drexel. Mr. William M. Singer ey, the publisher of the Record, is set down as worth \$3,000,000. He inherited part of it from his father. He has, however, made a large fortune by his own foresight and energy. Mr. Singerley is noted most of all for that high quality in man-steadfastness to his friends. Mr. Frank McLaughlin, the third in the trio of wealthy newspaper men, is the publisher and chief oner of the Times. Hs income is said to be \$80,000 a year. Mr. G. A. B. Crocker's Fence.

Crocker's fence is one of the sights of San Francisco. When Charles Crocker, the partner of Stanford, Hopkius, and Huntington, of the Central Pacific Railroad and a man worth many millions, bought his residence on California street he met with considerable opposition from a property-holder on Sacramento street. Crocker had acquired the entire block, with the exception of a single lot on the Sacra ento street side. The owner of this lot demanded an extra price for it, which Crocker agreed to give. the price was doubled, and Crocker accepted the raise. Again and again was the avaricious seller satisfied, until patience ceased to be a virtue. The rail road magnate got his mad up and sent word: "Tell him to —." Crocker built his house, laid out the groundwith rare good taste, and then "fenced in" his co-tenant on the block. He built a fence fifty feet high on three sides of the house on Sacramento street. Only the front view remained unim paired, and, as Sacramento street is very narrow, the front view is not a matter to care much for. The owner of the house soon siekened of his bargain, and moved it bodily away, but Crocker's fence remains.

Candles for the Dining-Room.

Even during the height of the furgra for lamps of artistic design, there existed a natural prejudice against the association of kerosene and dainty dishes, which fendered the lamp, however decorative in appearance, objectionable in the dining-room. objection is this season obviated by the introduction of candelabra for the dinner-table, the correct style being two candelabra, one at either end, on a table of small dimensions, and three or five on one of more ample proportions. This new old fashion has brought out in artistic metal work a variety of candelabra, but the correct style is repre sented in old English fashions handed down from father to son for the past 300 years without the slightest variance in outline and decoration from the original models.—New York Mail
